COURSE INFORMATION

The HIV/AIDS epidemic poses a severe threat to global health, development, and security. HIV and AIDS education therefore remains an essential worldwide method to prevent the disease from spreading. This specific education is aimed to reaching all ages, especially young adults, who are sexually active.

The objectives of this course are to:

1. To increase awareness on the current spread of HIV-AIDS at the global, regional and local levels and factors associated with the transmission of HIV-AIDS.
2. To understand natural history & basic clinical aspects of HIV-AIDS and biological & behavioral prevention of HIV-AIDS.
3. To understand unique characteristics of the youths and their roles in the prevention of HIV-AIDS.
4. To increase awareness and understanding on some specific youths problems related to HIV-AIDS transmission: behavioral problems, cigarette smoking, unsafe sexual behaviors, and drug & substance abuse.
5. To understand psycho-social impacts of HIV-AIDS and promote measures to address stigmatization of HIV-AIDS.
6. Identify the difference between HIV and AIDS
7. Explain the impact of HIV/AIDS on country
8. Describe supportive managements.

ASSESSMENT PLAN

Continuous assessment tests-	30%
End of semester sit in examination-	70%
Total	100%
Pass mark	50%

TIME MANAGEMENT

Log in to the course at least three times a week, if possible. This allows you time to read your classmates' posts, study and review material and upload your assignment. You don't have to be online while working on your assignment. However, you need to go back online to post your messages and assignments.

COURSE OUTLINE
